

# AN OUNCE OF PREVENTION

## Women's Health & The Environment

### WHO:

**Dr Devra Lee Davis,**

Senior Fellow, Health and Environment, World Resources Institute, Washington, DC

*Expert in the field of xenoestrogens (environmental contaminants) and their role in the skyrocketing breast cancer epidemic.*

**Dr Ana Soto,**

Department of Anatomy and Cellular Biology, Tufts University, Boston

*Scientist who identified the connection between breast cancer cell replication and plastics, featured in the CBC documentary *Sex Under Siege*.*

**Sharon Batt,**

*Author of *Patient No More* — breast cancer survivor and political activist*

### WHAT:

A public education forum about the impact of toxic chemicals on women's health: how chemicals affect us, how we can reduce our exposure and how we can work for their elimination from our environment.

### WHEN:

Friday, 29 March 1996 from 7pm to 9:30pm

### WHERE:

Judge McGill Theatre, Robson Square Conference Centre, Vancouver, B.C.

### WHY:

Because an ounce of prevention is worth more than throwing \$1 trillion at an elusive cure.
