

THE POWER OF CARING

Plays Part In **vancouver**

SAFE FIXING SITES would mean a dramatic reduction in the number of used needles and wrappers on the streets. Users would be monitored by trained peers and personnel to all but eliminate overdose deaths. They would have access to information, education and referrals as well as clean equipment which would contain and reduce the many devastating diseases that are presently such a burden on our health care. They would have access to support systems not available on the streets if they wish to try and fight or control their addictions.

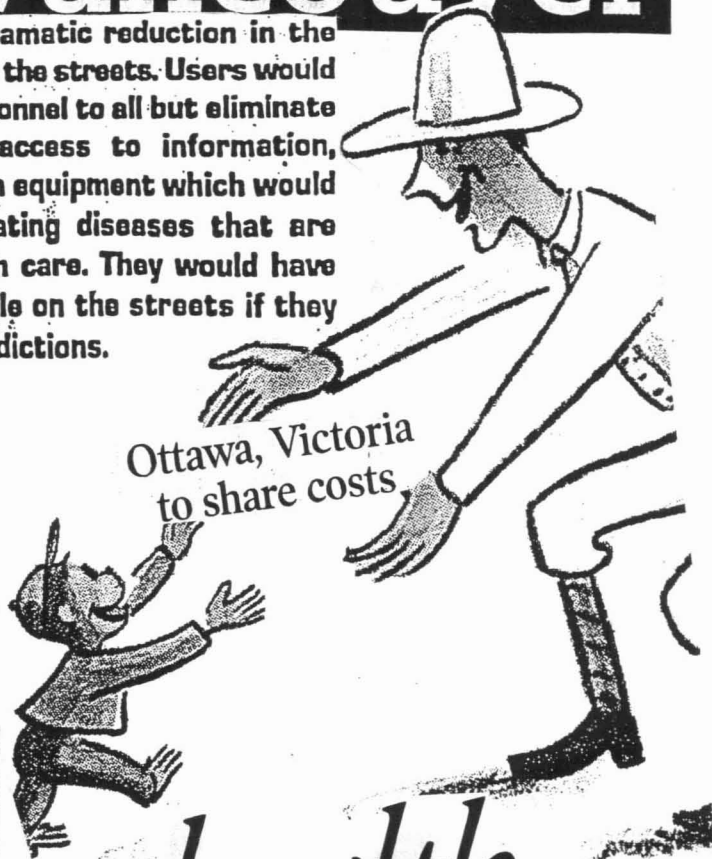

MULTI-PURPOSE COMMUNITY DRUG RESOURCE CENTRES allow Users access to community services presently denied them. Provide support services to aid in health, personal hygiene, social development, information, lifestyle transitions and referrals that will aid them in dealing more effectively with their addictions
